CAREER OBJECTIVE

Aspiring AI Engineer with expertise in Machine Learning, Natural Language Processing, Data Analysis, and Automation, along with practical experience in building and deploying AI models. Proficient in transforming complex data into actionable insights and developing scalable solutions. Seeking to apply technical skills in designing efficient AI systems that address real-world challenges.

EDUCATION

2022 – 2026 B.Tech in Artificial Intelligence and Data Science

Velammal Engineering College, Anna University, Chennai
CGPA: 8.6/10.0

2021 – 2022 Higher Secondary Certificate (12th Standard)

St. Aloysius Anglo Indian Higher Secondary School, Chennai
Score: 85.83%

2019 – 2020 Secondary School Certificate (10th Standard)

St. Aloysius Anglo Indian Higher Secondary School, Chennai
Score: 74.6%

INTERNSHIP & PROFESSIONAL EXPERIENCE

Azure Data Engineering Intern – Cognizant

Jan 2026 – Apr 2026 | Chennai

- Gained hands-on experience in Azure Data Engineering services including Azure Data Factory and Azure Synapse Analytics for building scalable data pipelines
- Designed and implemented end-to-end ETL workflows using Azure Data Factory to ingest, transform, and load data from multiple sources
- Developed a retail data pipeline project using Medallion Architecture (Bronze, Silver, Gold layers) to ensure structured data processing and improved data quality

AI Automation Intern – Friday Technologies Ltd

Jul 2025 – Nov 2025 | United Kingdom

- Automated business workflows using AI tools including n8n, GoHighLevel, and Make.com to streamline enterprise operations
- Developed and deployed voice agent solutions, integrating platforms such as Vapi and Retell for intelligent voice automation
- Collaborated with cross-functional teams on AI-driven process optimization across multiple client workflows

AI Intern – CDW Technologies

Jan 2025 | Chennai

- Developed prompt-driven NLP solutions leveraging Large Language Models (LLMs) for text generation tasks
- Implemented Retrieval-Augmented Generation (RAG) pipelines to enhance LLM responses with domain-specific knowledge
- Evaluated and benchmarked model outputs to improve accuracy and relevance of generated content

- Machine Learning Intern – Aristo Creative Technology

Nov 2024 – Dec 2024 | Chennai

 - Built and optimized machine learning models using Python and Scikit-learn on real-world datasets
 - Applied feature engineering techniques to improve model performance across regression and classification tasks
 - Conducted systematic model evaluation using standard metrics and delivered actionable insights from results

PROJECTS

Personalized AI Voice Assistant for Desktop Automation2025–2026

LLMs | NLP | FastAPI | React | Speech Processing | Groq API

Built a context-aware AI voice assistant enabling natural language-based desktop automation. Leveraged LLMs for intent classification and task execution, integrating speech recognition and speaker verification for personalized interaction. Designed a scalable system using FastAPI and WebSockets for real-time communication and low-latency responses.

Medical Health Chatbot2024–2025

NLP | RAG | LLMs | Groq API

Developed an intelligent healthcare chatbot powered by Large Language Models and Retrieval-Augmented Generation (RAG) architecture. Integrated Groq API for low-latency inference, enabling fast and accurate responses to medical queries. Implemented a curated knowledge base to ground the model’s responses in reliable healthcare information.

Image-Based Product Recommendation System2024

Computer Vision | OpenCV | Cosine Similarity | Feature Extraction

Designed an e-commerce recommendation tool that identifies visually similar products from user-uploaded images. Applied deep learning-based feature extraction combined with cosine similarity scoring for efficient product matching. Leveraged OpenCV for image preprocessing and built an intuitive interface for seamless user interaction.

TECHNICAL SKILLS

Programming	Python, C, C++
AI & Machine Learning	Machine Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Model Evaluation & Optimization
Frameworks & Libraries	NumPy, Pandas, Scikit-learn, Matplotlib, OpenCV
Data Engineering & Cloud	Microsoft Azure (Azure Data Factory, Azure Synapse Analytics), ETL Pipeline Design, Data Warehousing, Data Transformation & Orchestration
Databases & SQL	MySQL, SQL Workbench, Advanced SQL (Joins, Window Functions, CTEs, Subqueries, Query Optimization), Data Modeling
AI Automation & Systems	n8n, Make.com, GoHighLevel, Vapi, Retell
Data Analysis & Visualization	Power BI, Tableau

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Artificial Intelligence & Machine Learning**
 - Generative AI for Beginners – Udemy
 - Introduction to Data Analytics and AI – Udemy
 - Supervised Machine Learning: Regression and Classification – Stanford (Coursera)
- **Data Engineering & Cloud Technologies**
 - Azure Data Factory: Data Engineering on Azure and Fabric – Udemy
 - Azure Synapse Analytics for Data Engineers – Udemy
 - Cloud Computing Fundamentals – Udemy
- **Data Warehousing & Advanced SQL**
 - SQL for Data Analysis: Advanced Querying Techniques – Udemy
 - Relational Database Design – Udemy
 - Data Warehouse ETL Testing & Data Quality Management – Udemy
- **Data Analytics & Visualization**
 - Microsoft Power BI and Tableau – Imarticus Learning
 - Data Analytics with Python – NPTEL

ACHIEVEMENTS & RECOGNITION

Hackathons & Competitions

- **Certificate of Merit** – ALTRUIXX 2K25, SRM Valliammai Engineering College 2025
- **Semi-Finalist** – National Level Hackathon, Saveetha Engineering College 2024

Platform Badges & Additional Certifications

- **HackerRank Certified** – Python, SQL (Basic & Intermediate), and Problem Solving
- **HDCA Certified** – CSC Computer Education; trained in MySQL, C, C++, and Python
